KONA ELECTRIC

* The figures refer to the 64 kWh battery version. All figures are under WLTP (Worldwide Harmonised Light-Duty Vehicles Test Procedure) regulations, which measure fuel, energy consumption, range and emissions in passenger vehicles in Europe. This is designed to provide figures closer to real-world driving behaviour. According to the NEDC (New European Driving Cycle), the driving range is 546km. NEDC is the current method of testing, which is being replaced with WLTP.
 ** Up to 80% state of charge, if charged at a 100 kW DC charging station.

Effective from 20 Jun to 03 Jul 2019
 COE Offset at \$523,000
